

Employee Engagement Increases Learning & Performance

Because engagement is such a critical part of learning, having the ability to confirm individual and team engagement during training is important. Jigsaw quantifies actual engagement and activity levels of everyone during training and collaborative sessions. For the first time the Learning & Development team's ROI is easily confirmed through training engagement and performance tracking.

Learning Behavior Analytics Help Review Performance

Analytics captured real time delivers quantifiable information around various components of learning on an individual, group and instructor level. This detailed information, delivered in a flexible series of layouts, empowers the Learning & Development team as they continue to improve programs that meet employee and corporate learning needs.

Engagement Data for Performance Improvement

An analytic comparison of engagement data can assist trainers in better understanding why some employees perform better than others. It also delivers information that identifies what types of content and instruction employees prefer.

Jigsaw Interactive Automatically Measures Employee Engagement and Helps Identify Each Employee's Learning Behaviors

Changing How the World Learns and Collaborates
